Riyadh, KSA (Transferable Iqama)

Software Engineer | JavaScript | React | Node | AWS | AZURE

Experienced Senior Full Stack Developer with over 6 years of expertise in creating scalable, high-performance applications using **Next, React, React Native, Django, Node.js and Strapi**. I specialize in optimizing frontend and backend systems to improve application performance and user retention while ensuring robustness and maintainability. My skills include cloud technologies like **AWS (S3 and EC2) and secure API** design using **OAuth2 and JWT**. I utilize tools such as **Redis** and RabbitMQ for efficient data handling and messaging in microservices architectures. With a strong foundation in UI development, I leverage **HTML, CSS, Bootstrap, Tailwind, TypeScript**, and JavaScript to build dynamic applications using **REST, gRPC** and **GraphQL** APIs.

Interpersonal Skills:

Enthusiastic, Delighted team Player, Work Management, Collaborative, Quick Learner, Work under Pressure, Positive Attitude, Ethical, Respectful

Skills:

- Language:** JavaScript(ES6+), TypeScript, SQL, Mongoos, HTML, CSS, SCSS, Go, Python, CI/CD, SQL, GraphQL
- Frontend:** React, Next, React Native, Redux, Zustand RxJS, Bootstrap, Tailwind CSS, Material Design, Material-UI
- Backend:** Node, Nest.js, Express, Django, Strapi, Python, Redis, kafka, Sockets, RabbitMQ
- Database:** NoSQL, MongoDB, CosmosDB, PostgreSQL, MySQL, MSSQL, Redis
- CI/CD:** AWS, Azure, GCP, Docker, Terraform, kubernetes, Jenkins, Git/Github/GitLab, Bitbucket
- Other:** Firebase, Unit Testing, Jest, Microservices architecture, Agile/Scrum, kafka

Professional Experience

Software Engineer 5/2025 – Present
Byte Legion Remote, USA

- Led and mentored cross-functional teams (**8 developers on AISS and 4 on Barbunny**) to deliver high-impact projects on time and within budget.
- Directed full-stack development on **AISS** using **Vite, Vue, Node.js, Typescript, PostgreSQL, AWS, and CI/CD** pipelines, ensuring scalable and maintainable solutions.
- Oversaw end-to-end development of **Barbunny**, a native mobile app built **with React Native, Expo, React.js, Node.js, Socket.IO, PostgreSQL, and AWS**, integrating **real-time communication** features.
- Architected and guided **Jetolink** using Next.js, **TypeScript, microservices architecture, Kafka, Redis, NestJS**, and **PostgreSQL with OAuth**, delivering secure chat applications with robust performance.
- Established **CI/CD pipelines** and implemented automated **unit testing** with **Jest**, improving deployment efficiency and code quality. Coordinated with stakeholders, **prioritized tasks**, and provided technical leadership while ensuring alignment with business goals.
- Currently managing ongoing **support, maintenance, and enhancements** of deployed applications, ensuring reliability and continuous improvement.

Integration Engineer 12/2024 – 4/2025
DU Telecom Dubai, UAE

- Led the implementation of a **Next.js-based front-end interface with SSR and SEO optimization**, resulting in a 30% increase in user engagement and high client satisfaction.
- Enhanced **Node REST APIs** and backend logic, achieving a 20% improvement in request handling and processing speed.
- Integrated **Strapi as a headless CMS** for dynamic content management, streamlining content updates and improving editorial workflow.

- Migrated legacy systems to AWS Cloud, significantly enhancing scalability and reducing operational costs by 30%.
- Partnered with cross-functional teams to gather and refine project requirements for **Next.js (SSR) and React projects**, ensuring the timely delivery of seven high-impact web applications.
- Conducted thorough code reviews and mentored junior developers in **Next.js and React development best practices**, boosting team productivity by 25%.
- Implemented **Google BigQuery** for large-scale analytics, optimizing data workflows and reducing query latency through clean, modular code.
- Developed new features for admin and web portals from the ground up using **Next.js (SSR)** on the front end and **React for dynamic modules**, backed by **Node and PostgreSQL** for robust backend operations.
- Built RESTful APIs using **Node** to enable seamless communication between microservices and the **Next.js SSR-based frontend**, within a fully test-driven development (TDD) environment.

Software Engineer09/2023 – 11/2024

Byte LegionRemote, USA

- Engaged as a Full Stack Engineer utilizing **React Native** for cross-platform mobile development, along with **React.js and Next.js (with SSR and SEO)** for web applications.
- Engineered robust backend services using **Node.js (Express)** with **MongoDB** and **PostgreSQL**, addressing complex business logic and improving response times.
- Designed and optimized **RESTful APIs, cron jobs, and webhooks** using Node.js and Django, ensuring scalable microservice communication and reliable third-party integrations.
- Developed mobile and web apps that led to a **20% increase in active sessions and user engagement**, driven by intuitive UX and smooth performance across platforms.
- Integrated and maintained **AWS services** such as **S3, EC2, RDS, and Lambda**, significantly enhancing application scalability, uptime, and data security.
- Collaborated with the UI/UX team to deliver **accessible and responsive designs**, resulting in a **10% improvement in accessibility scores** across web and mobile platforms.
- Diagnosed and resolved CI/CD issues in **Jenkins pipelines**, optimizing build flows and deploying containerized services using **Kubernetes (K8s)** with persistent volumes.
- Followed Agile best practices to deliver **incremental and testable features**, contributing to a **15% boost in delivery speed** and stronger stakeholder alignment.
- Maintained a strong focus on **code quality, performance tuning**, and industry standards, leveraging **JavaScript, TypeScript**, and **Go** across multiple layers of the stack.

Software Engineer06/2021 – 08/2023

CodeSixLahore, Pak

- Developed and maintained mobile-first and responsive applications using **React Native, React.js, and Next.js (with SSR and SEO)** within a microservices architecture.
- Built and maintained backend services using both **Node.js (Express)** and **Django (DRF)**, supporting scalable APIs and secure data access across multiple platforms.
- Assisted in enhancing UI/UX using **Next.js with Material UI**, improving visual consistency and interactive user experience across devices.
- Implemented **OAuth 2.0 authentication** with backend services in **Go**, later expanded across **Node** environments to ensure secure, centralized access control.
- Deployed applications to **AWS** using **Docker**, gaining hands-on experience with cloud deployment, containerization, and service orchestration.
- Wrote clean, well-tested code and optimized performance through **collaborative debugging and testing sessions**, contributing to application reliability.
- Worked closely with cross-functional teams to align on build and deployment pipelines using **JIRA**, and contributed to **database design and refactoring** to ensure data integrity and performance (PostgreSQL, MongoDB).
- Integrated multiple **AWS services** (e.g., **S3, RDS, CloudWatch**) to improve reliability, monitoring, and scalability of applications.
- Gained solid grounding in **Agile workflows and project management** through mentorship, and consistently participated in code reviews to apply and learn industry best practices.

Jr Software Engineer01/2020 – 05/2021

Systems LimitedLahore, Pak

- Developed scalable email server management system with **Node.js and RabbitMQ**.
- Utilized **Strapi, Nextjs, Material-UI, and Formik** for an enhanced user interface.
- Implemented **server-side rendering (SSR)** with **Next.js** for improved **SEO** performance.
- Employed Docker for containerization and **CI/CD pipelines** for automated deployment

EDUCATION

Bachelor’s Degree: Software Engineering

CERTIFICATION

AWS, Google Certified MYSQL, MongoDB, Cisco
